30-TON TILT DECK

The SAW T603 30-Ton Tilt Deck is a workhouse trailer made for transporting heavier equipment. As equipment gets heavier the added weight puts additional stress on the trailer frame. The T603 is reinforced at the tension areas with added reinforcement at the suspension transition. Its rugged frame and long tilt deck let you load and unload your heavy equipment with ease and get it transported where you need it, when you need it.
